 (c) Mathematics 4. Effects of SES on children's academic achievement (e.g., English) is <u>A.</u> larger, B. the same C. smallest when students grow older (e.g., P.3 to S.3). 5. As compared to S.3 students, P.3 students consider less their performance in <u>A. Chinese B. English C. Mathematics</u> in deciding their educational aspiration (the highest educational level they will study). 6. Who are having more physical exercise every day? 			-	
 4. Effects of SES on children's academic achievement (e.g., English) is <u>A</u>. <u>larger, B. the same C. smallest</u> when students grow older (e.g., P.3 to S.3). 5. As compared to S.3 students, P.3 students consider less their performance in <u>A. Chinese B. English C. Mathematics</u> in deciding their educational aspiration (the highest educational level they will study). 6. Who are having more physical exercise every day? 			-	
 larger, B. the same C. smallest when students grow older (e.g., P.3 to S.3). 5. As compared to S.3 students, P.3 students consider less their performance in A. Chinese B. English C. Mathematics in deciding their educational aspiration (the highest educational level they will study). 6. Who are having more physical exercise every day? 				
 5. As compared to S.3 students, P.3 students consider less their performance in <u>A. Chinese B. English C. Mathematics</u> in deciding their educational aspiration (the highest educational level they will study). 6. Who are having more physical exercise every day? 				
 in <u>A. Chinese B. English C. Mathematics</u> in deciding their educational aspiration (the highest educational level they will study). 6. Who are having more physical exercise every day? 				
aspiration (the highest educational level they will study).6. Who are having more physical exercise every day?				
6. Who are having more physical exercise every day?				
A. high achievers in both P.3 and S.3;				
B. low achievers in both P.3 and S.3;				
C. high achievers in P.3 and low achievers in S.3				
D. low achievers in P.3 and high achievers in S.3				
7. Students using more internet for learning in and out of lesson are getting				
A. better B. similar C. worse academic results.				
8. Who are spending comparatively more time on internet game/social media				
in and out of lessons? (A) low achievers in AND out of lesson,				
(B) everyone in AND out of lessons ;				
(C) low achievers in lessons and everyone out of lesson,				
(D) high achiever in and out of lesson				
(E) high achievers in lesson and everyone out of lesson				
9. Cyber bullying is a serious problem because:				
(A) a high % of children are being bullied and parents are aware of their				
children being bullied, (B) the % is low, but parents are not aware;				
(C) the % is high and parents are not aware;				
(D) the % is low and parents are aware.				
10. On students' time spent on homework assigned by schools,				
(A) some schools give much more homework and some students are				
spending very long hours on homework,				
(B) most schools have similar amount of homework but some students are				
spending long hours on homework;				
(C) most schools have similar amount of homework and most students				
are spending long hours on homework;				
(D) most schools have a lot of homework and most students are spending				
long hours on homework.
